- ✓ **Available in a resealable pouch** containing 50 x 2 g sachets.
- ✓ **Available from your preferred wholesaler.**

HOW TO USE EQUESTRA?

Dose Rate:

Sprinkle Equestra granules onto 20 g of dry feed. Wait 30 minutes before feeding remaining feed. One 2 g sachet contains 500 mg of omeprazole.

Adult Horses:

Treatment: Omeprazole 2 mg/kg body weight (one 2 g sachet per 250 kg) once daily for two weeks followed by daily maintenance dosing.

Maintenance: Omeprazole 1 mg/kg body weight (one 2 g sachet per 500 kg) once daily while horses remain in training, or as directed by a veterinarian.

Administration Route: Oral.

Precautions: If used in performance animals, the regulations of the relevant authorities regarding medication should be observed.

Safety directions: Wash hands after use.

Storage Conditions: Store below 25 °C (air conditioning).

Please refer to pouch for full product information.
